produces a fatal illness some hours after it is ingested. ~~Treichler~~ distinctly remembers the flaps-and-seals job he had to do on the box and on each of the wrapped cigars, both to get at the cigars and to erase evidence of tampering. He kept one of the experimental cigars and still has it. He retested it during our inquiry and found that the toxin still retained 94% of its original effectiveness. The cigars were so heavily contaminated that merely putting one in the mouth would do the job; the intended victim would not actually have to smoke it.

Gunn's notes show that he reported the cigars as being ready for delivery on 7 October 1960. ~~Treichler's~~ notes do not show actual delivery until 13 February 1961. They do not indicate to whom delivery was made. Gunn states that he took the cigars, at some unspecified time, and kept them in his personal safe. He remembers destroying them within a month of Sheriff Edwards retirement in June 1963.

(Comment: Others recall the cigar scheme, but only as an idea that was considered and then discarded. Roosevelt, Chief of TSD at the time, and O'Connell, the case officer, recall the cigar scheme, but feel that it was never considered seriously. To Gunn and ~~Treichler~~ who gave it a good deal of time but did not participate in the broader operational discussions, the cigars loom as important.)
